

Who We Are

Mission & Values

To provide expert, compassionate care for seniors with psychiatric needs, treating both mind and body with dignity and respect. Our care is built on empathy, clinical excellence, and a commitment to whole-person wellness.

Facility Overview

Our safe, modern hospital is designed specifically for older adults with behavioral health needs. The facility includes comfortable semi-private rooms, therapeutic activity spaces, dedicated dining areas, and secure outdoor courtyards to support healing and mobility.

Accreditation & Licensing

Harmony Health is licensed by the state and accredited by nationally recognized organizations, including The Joint Commission. We are committed to the highest standards of safety, quality, and continuous improvement in behavioral healthcare.

We are committed to providing quality, patient-focused care to individuals with primary psychiatric diagnoses.

Who We Serve

We specialize in psychiatric care for adults 45+ experiencing:

- Anxiety
- Psychosis
- Schizophrenia
- Behavior disturbances
- Depression
- Mental disorders resulting from brain injury, stroke, or other neuropsychiatric conditions

Treatment & Services

Inpatient Program

Provides 24/7 psychiatric and medical support for older adults requiring stabilization. Focused on safety, dignity, and individualized care.

Intensive Outpatient Programs (IOP)

Structured therapy for adults and seniors needing support but not full hospitalization. Reduces isolation, maintains independence, and prevents hospital readmission.

Interdisciplinary Team

Team includes psychiatrists, nurse practitioners, physicians, nurses, social workers, psychologists, dietitians, activity therapists, clinical pharmacists, discharge planners, and mental health technicians.
